Contain with Confidence.

Providing simple and flexible liquid transport and storage, the FLEX TANK is constructed from heavy duty flexible PVC coated fabric. Safe and reliable, the FLEX TANK is fitted with relief valves to prevent overfilling and a robust 50mm ball valve with quick release couplings for easy connection. Popular with the military, fire brigades, foresters and farmers, FLEX TANKS with 'food grade' PVC coating are also supplied to relief agencies to provide drinking water to famine stricken areas. They come with a protective holdall supplied as standard.

Advantages

- Strong, flexible, versatile and easy to deploy.
- Reinforced construction to ensure reliability.
- Easy to repair
- Folded compactly for easy storage and transport.
- Excellent resistance to extreme weather conditions, abrasion, corrosion and long term standing use.
- Sizes range from 1,000 Litres to 450,000 Litres and beyond, available upon request.
- Draining is achieved quickly and easily via gravity flow.
Ready for immediate deployment when leaving our manufacturing facility.
